Learn · Connect · Advance

Facility managers are in unique position to improve the sustainability operational performance of facilities. It is not only showing our commitment to addressing global warming but also enhancing the corporate image and improving the working environments.

We have invited **Ir Patrick So**, Engineer from Electrical and Mechanical Services Department to walk us through the 2015 update on Code of Practice for Energy Efficiency of Building Services Installation (BEC), and **Mr. Chiu Pak-kan**, Senior Environmental Protection Officer, Environmental Protection Department to share with us the waste management roadmap in Hong Kong. Also hear the industrial leaders say in Zero Waste Corporate Challenge, Auto Lighting Control in BEC 2015, introduction on Sustainability Facility Professional®, LEED training & IAQ training and Sustainable Business Award.
