	17 Sat

Daya Bay Nuclear Power Station

Daya Bay makes use of French reactor technology and British turbine-generator equipment, providing an installed capacity of 1,968 MW. Since the beginning of commercial operation in 1994, it has been generating typically over 14 billion kilowatt-hours of electricity a year. 70% of the electricity is supplied to Hong Kong and the balance to Guangdong province.

The electricity produced by Daya Bay saves Hong Kong each year some 7.5 million tonnes of carbon dioxide, some ten thousands tonnes of sulphur dioxide, and nitrogen oxides, as well as hundreds of tonnes of airborne particulates that would otherwise be released into the atmosphere by fossil fuel generation.

ITINERARY :

- 07:30 Take off from Assembly Point
*Bus will depart at 07:30 sharp. There will not be refund to late participant.
- 09:45 Daya Bay Public Relations Centre
- 10:00 "Nuclear power generation and safe operation of Daya Bay"
- 11:00 Exhibition Hall
- 11:40 Simulation Room
- 11:55 Daya Bay Viewing Platform
- 12:30 Lunch
- 14:00 Return trip from Daya Bay

ASSEMBLY POINT :

07:15 Exit F, MTR Kowloon Tong Station

ADMISSION FEE :

- IFMA Hong Kong Chapter Members : HK\$ 80
- IFMA Base Members / Member of Supporting organizations/ Corporate Sponsors : HK\$ 150
- Non-members : HK\$ 200

CPD : 5 hours

LANGUAGE: English

ENQUIRY : 2512-0111 / registration@ifma.org.hk

TERMS AND CONDITIONS : Please refer to www.ifma.org.hk
