

Building Energy Efficiency Forum

Investors, Developers, Landlords and Occupants

30 September 2008 | BEC Auditorium, HK

This high-level one-day interactive forum will provide a latest overview of energy performance in existing buildings and available programs in promoting energy efficiency. Industry experts will share cutting edge presentations that will raise your bar of energy efficiency and performance to a new level. You can also learn from leading landlords, developers and designers their remarkable efforts and case studies.

Confirmed speakers:

- Ms Janet Pau, Asia Business Council
- Mr Kevin Edmunds, Business Environment Council & BEAM Society
- Ms Maria Pereira, Clinton Foundation
- Dr Paul Bannister, Exergy Australia
- Mr Robert Allender, Energy Resources Management
- Mr David Nieh, Shui On Land
- Mr Sunny Yeung, Sino Land

Main topics:

- Green buildings are key to Asia's future
- Retrofit funding program
- Guidance on performance contracting
- Energy efficient operation from existing premises
- Energy efficient design for the Tamar Development
- Success strategies for energy efficiency improvement in Australia
- Clean Air Charter case study
- New Move in Building Environmental Assessment Method (BEAM)
